

This lubricant is designed to quickly penetrate and lubricate working parts to eliminate annoying sticking and squeaking caused by friction. The non-oily, colorless formula saves wear and tear on moving parts. It prevents corrosion by applying a clear, invisible coating that is not easily washed or worn away, even in outdoor use. It will not harden, cake or gum with age. It offers water repellent properties for use on colorfast fabrics without stain or discoloration. Used as a mold release agent, it enables quick, clean release of parts.

Features	-	Related Benefits
Aerosol spray	-	Easy to use
Silicone lubricant	-	Lubricates and protects
Invisible water repellent coating	-	Retards rust and corrosion
Non-oily, colorless	-	No buildups, non staining
Release agent	-	Quick release of parts
